

David C. Thomas

1215 Union Church Rd, 30824 | 706-832-5220 | dthomas385@gatech.edu | U.S. Citizen

Objective

Motivated 3rd-year Computing Engineering student with hands-on experience in programming with Java and Python, IT technical skills, and AI-driven software projects. Seeking a summer internship in information technology or cybersecurity starting May 2026 to apply technical problem-solving skills, secure coding practices, and collaborative project experience to real-world challenges.

Education

Georgia Institute of Technology | Atlanta, GA

Bachelor of Science in Computer Engineering, GPA 3.30

Concentration: Cybersecurity and Computing Hardware & Emerging Architectures

August 2023 – Present

Expected Graduation, May 2027

Skills

Programming: Java, Python, C, JavaScript, HTML, C++, XML

Hardware: Raspberry Pi, FPGAs, Creston

Software: GitHub, Visual Studio Code, Docker, Ninja One, Lansweeper, Active Directory, Quartus, Microsoft Office

Experience

Columbia County Information Technology | Evans, Ga

Technical Support Engineer Intern

May – August 2024

&

May – August 2025

Columbia County IT Department delivers technology solutions and network security to enhance government operations

- Deployed and replaced over 150 machines with updated models
- Resolved over 50+ service desk tickets and assisted in over 200+ additional service desk tickets.
- Developed a customized automation script on a flash drive to upgrade over 900 machines to Windows 11
- Supported IT policy creation and enforcement using Ninja One to monitor over 1500 machines.

Projects

Amparo | Team Project

2025

Frontend / Backend developer

Developed an AI-powered job-hunting platform designed to critique resumes and provide personalized job recommendations

- Designed and implemented a user-friendly website with smooth, engaging transitions for improved user experience.
- Built an AI chatbot using Google Gemini API to evaluate resumes and suggest job opportunities aligned with candidate skills.
- Collaborated with a team to distribute tasks effectively, leveraging individual strengths to enhance both teamwork and programming skills.

IOS MDM | Work Project

2025

Developer

Created an MDM policy using Ninja One to monitor and manage over 150+ mobile devices remotely.

- Implemented restrictions to block unwanted app installations and enforce timely updates.
- Developed a custom XML payload to remove default apps from the home screen, reducing clutter and improving usability
- Configured ABM tokens to enforce installation of required business apps.
- Integrated a business Apple ID to prevent device lockouts and ensure consistent access.

Relevant Coursework

Digital Computing Systems: Designed, simulated, and implemented digital circuits using CAD tools, VHDL, and FPGA boards.

Conducted timing analysis, developed state machines, and collaborated on a team design project with technical documentation.

Computer Organization and Programming: Explored computer architecture and machine-level programming through C and assembly. Developed problem-solving and coding skills by implementing algorithms and interacting with digital hardware.
